

Fisher M-Scope Walk-Through Metal Detector

Model : M-Scope

Manufacturer : Fisher

Fisher M Scope Portable Walk-Through Metal Detector.

- When we say portable we mean a truly dynamic detector capable of being rapidly deployed within minutes instead of hours. With only one operator the M-Scope can be deployed and transported to virtually any location and be up and running within five minutes! With a battery life of 40 hours, a total weight of 87 pounds (42 kilos), and a unique one-person transport configuration when collapsed, the M-Scope will empower you with before unavailable security solutions. No need for a truck – the M-Scope is the only walk-through that can be moved in a van or even a car.
- The M-Scope operates on AC (110V or 220V) or DC power. Due to its feature and function benefits the M-Scope addresses a wide variety of security needs. It is the smart choice for professionals requiring a walk-through detector in a permanent location as well as needing to move it to multiple locations, even on short notice. The best of both worlds plus a true cost saver.
- Police departments worldwide have used the M-Scope for random screening on streets or in train stations. Other typical customers include schools and courts who need the specifications found in more expensive detectors. Night clubs and bars select the M-Scope because it is quick to put up in the evening and take down in the morning. The M-Scope is used to secure numerous government and military buildings, especially for applications where additional security must be rapidly deployed.
- The M-Scope is user-friendly and simple to operate. We have reduced training time requirements while boosting "split cognition" - that is creating a system so reliable that operators are freed up to monitor the activity around them- performing vital crowd-scanning functions instead of having their attention monopolized by running the metal detector unit. The M-Scope's digital I/O, secured access control panel has been designed for intuitive ease-of-use and has a built-in self-diagnostic function that will notify operators immediately if there is a situation requiring attention. The M-Scope multi-zone portable walk-through metal detector features 100 sensitivity settings- giving users an unprecedented array of responsive and variable security detector options.
- Intelligent, Dynamic, Effective: the M-Scope by Fisher empowers you with real solutions and real answers to those questions- If security is your responsibility- If you're the one who has to explain why – Mscope is the one.

Product Features:

- Portable and Permanent Security
- Single person assembly without tools - in less than 5 minutes
- Operates approximately 40 hours on rechargeable batteries

WalkThrough Metal Detectors > Fisher M-Scope Walk-Through Metal Detector

Fisher M-Scope Walk-Through Metal Detector

included

- Universal Power Adaptor/Charger (Adaptor kit available for non USA receptacles)
- Three Sensor Zones with Brilliant LED Detection Indicators
- Head-to-Toe, Zone Specific Detection
- 100 Levels of Sensitivity, Adjustable
- Environmentally sealed keypad with security access control
- Brilliant LED Bar Graph Indicates Target Strength
- Lighted LED Displays MScope Configuration
- Memory Feature Stores Settings for Multiple Operating Environments
- Multi-Mode Traffic Counter
- Factory and User Definable Presets
- Access Menus/Password Protection
- Adjustable Volume Control
- Portable Dimensions: 37 x 23 x 26" (94 x 58 x 66 cm)
- Weight: 87 lbs (42 kilos) - can be transported in a car or van
- Warranty: 24 months parts and labor
- Made in U.S.A patented technology
